

Let's Talk
SIGNOMICS™

Presenting Arrive365™, the futuristic digital signage full service cloud platform.

ARRIVE 365™

Not so long ago, digital signage was really expensive, complicated needing large investments and complicated workflows to execute. Today, with the Arrive365 cloud platform, the situation is very different. We offer a premium signage platform, that is affordable and budget friendly. We are a full-service signage platform to power from a single sign to thousands of networked signages including content development, programming services and developers of themed artwork for your business spaces.

Arrive365 is not just about networking display screens that shows images or videos to the public. Our product range includes interactive room booking signage and lobby signage, signage processors to power up 4K displays and video walls, as well as retail shelf talkers, co-working workstations labels, visitors management and digital wall art. This plethora of signage opportunities is driven via the Arrive365 Platform as a Service (PaaS) available at www.arrive365.com.

Arrive365 is a cognitive signage platform that transforms customer focus and your business' story through high-impact visual messaging. We bring the latest in technology trends such as Social Media, Artificial Intelligence (AI), Machine learning (MC), Internet of things (IoT) and block chain capability to transform visual communications like never before.

- + Increase customer engagement with dynamic content as well as social media feeds from Instagram, Facebook, Twitter.
- + Display branding, promotions, corporate messaging and announcements in a variety of dynamic media inputs to point of action via the Arrive DSCloud and innovative end-to-end media tools that get your messaging smarter, leaner and faster.
- + Scale your signage, labels, artwork and social media communication on budget and support growth plans with Arrive's innovative end-point tools.
- + Use Arrive365 Commit Service Support to provide full-service content development, creative graphics and programming services.

What is Arrive365™ ...

Arrive365 is the new generation digital social signage cloud platform that offers full-service and innovative features making us as the leading futuristic premium signage service provider.

Arrive365 helps you manage visual communication and messaging opportunities like never before.

We make it convenient to rapidly address communication challenges with advanced skills, world-class products and proven experience in design, build and manage programs.

Working with Arrive365 you'll quickly discover how simple it is to achieve your goals while we handle the complexity behind the scene.

Arrive SignBox™ & Signstix™

Powerful compact signage processors for Enterprise and small to medium business signage network deployment.

Hassle-free signage system with zero configuration.

Arrive Signage Processors provide dazzling visual communication displays to one single or thousands of networked signs across the globe. Provisioning is made simple with zero configuration end-points that use Arrive's BreezUp discovery and sign management protocol.

- + Arrive BreezUp provides hassle-free auto-setup with Arrive365 DS Cloud.
- + 4K Display Resolution Support and graphic processing.
- + Small footprint for unobtrusive fixing behind any type of signage display.
- + PoE Network Capable (SignBox) Wifi capable (Signstix).

Why is Arrive365™ ahead in the DS Game:

We are the most innovative Digital Signage Cloud Platform offered as a secure service embedded with Arrive's own technology:

Arrive BreezUp™ - Zero config IoT protocol for networked screen provisioning for easy set-up and management.

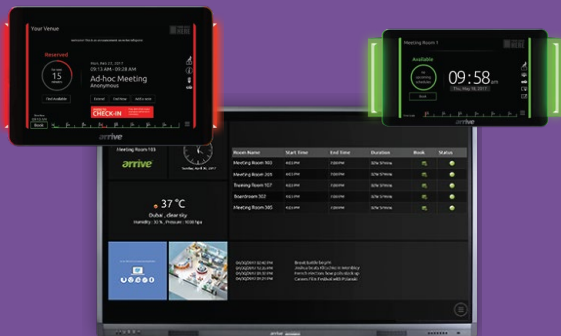

Arrive SignDirect™ - One place to manage design and deployment available to you on a secure hosted platform. Convenient template based tools for quick design.

Arrive TEye™ - Futuristic tools that are being provisioned as part of Arrive365 DNA to provide artificial intelligence based content delivery and messaging, using cognitive machine learning and block-chain auditing.

Arrive Room & Lobby Signs

Touch interactive room booking and lobby information displays with LEDlit status indication.

Make the most of your meeting and shared business spaces with Arrive Door and Lobby Signs

- + Completely eliminate conference room and meeting spaces scheduling conflicts and provide visual communication and information outside the venue doors and common lobby spaces.
- + Leverage the information analytics tools from Arrive to establish optimal space requirements as well as types of meeting spaces.
- + Reduce meeting scheduling and management time and automate the entire process of meeting invitations, room scheduling and visitor management.
- + Make the reservation and check-in process efficient to save time and enhance attendee morale.

Why does Arrive365™ do it best?

At Arrive®, only those ideas that generate value are considered innovations. Solving problems, creating advantages, maximizing opportunities - those are the ideas that we bring to customers.

For us, new technology for the sake of technology is not enough. Our teams work with customers to find creative solutions to tangible business problems. Whether it's inventing something that has never existed or applying a proven idea in a new way, our innovations are developed with customers to deliver customer-focused benefits.

Arrive is an innovative developer, focused on creating products and solutions deliver unprecedented value by saving costs and time. Our solutions drive human interaction, quality and quantity of communication while positively impacting business revenues.

Arrive DigiLabels™

Workstation Booking labels for co-working spaces and Retail Shelf talkers for dynamic pricing. Visitor badges.

Information at your fingertips

- + Eliminate human error by creating digital labels for high volume textual information needs.
- + Automate the Point-of-Information signage requirements with low cost eInk micro-powered wireless digital labels.
- + Update current information and interaction for high volume and high traffic areas.
- + Provide actionable information on personal devices using QR codes on Arrive DigiLabels.

Who we are...
